Dear Chair of NSAC,
Dear Representative of NSAC in NuPECC,
Dear Gail,

NuPECC is launching the process of creating a new Long Range Plan (LRP) for Nuclear Physics in Europe, identifying opportunities and priorities for nuclear science in Europe, with the aim of publishing the document in 2024. The previous Long Range Plan can be found at <http://nupecc.org/pub/lrp17/lrp2017.pdf> and an assessment of its implementation at http://nupecc.org/2017_LRP_Assessment_of_Implementation_final.pdf.

With the intention of strengthening the bottom-up approach that has always played an important role in its LRPs, NuPECC is opening a call for inputs to the next LRP in form of short (5 page) documents describing the view of collaborations, experiments, or communities on the key topics for the next 10 years to be included in the upcoming LRP.

In particular, contributions reflecting involvement of European nuclear physics groups and a vision of your respective institutions and communities for further collaboration with Europe are warmly welcome.

The call will be open until **1 Oct 2022**. Details concerning the submission procedure and the format of inputs can be found at the submission site <https://indico.ph.tum.de/e/LRP2024-input> .

Marek Lewitowicz
on behalf of the NuPECC LRP2024 Steering Committee
